

WEEK 7 SKILL

The screenshot shows the VS Code editor with the 'StudentRecordsAPI' project open. The Explorer sidebar on the left shows the project structure: controllers, models, routes, and node_modules. The main editor displays the 'package.json' file, which includes the following content:

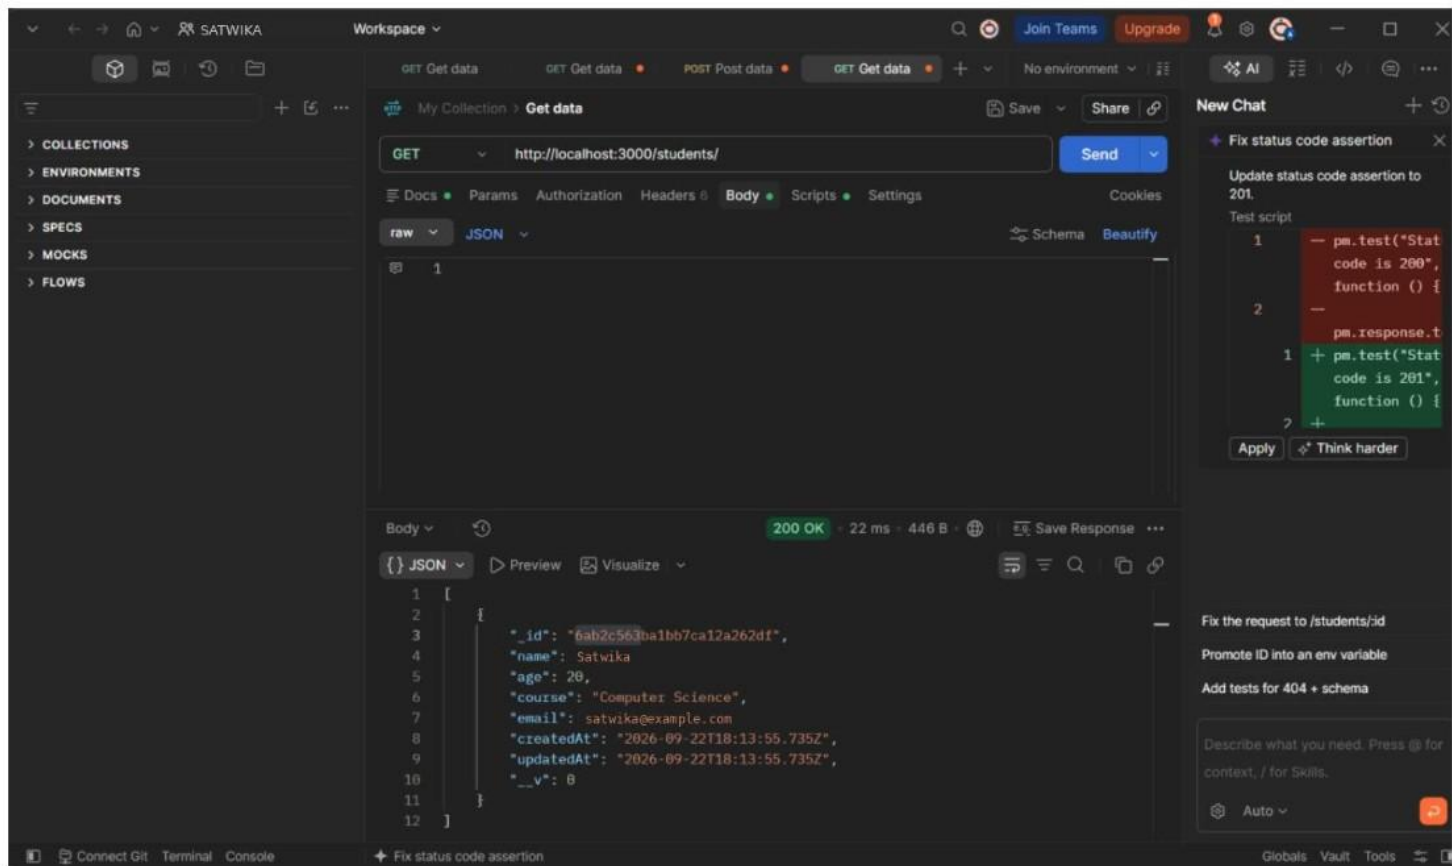

```
{
  "name": "studentrecordsapi",
  "version": "1.0.0",
  "description": "",
  "main": "index.js",
  "scripts": {
    "dev": "nodemon server.js"
  },
  "keywords": [],
  "author": "",
  "license": "ISC",
  "type": "module",
  "dependencies": {
    "express": "^5.2.1",
    "mongoose": "^9.10.2"
  },
  "devDependencies": {
    "nodemon": "^3.1.14"
  }
}
```

The terminal at the bottom shows the command 'npm run dev' being executed, resulting in the following output:

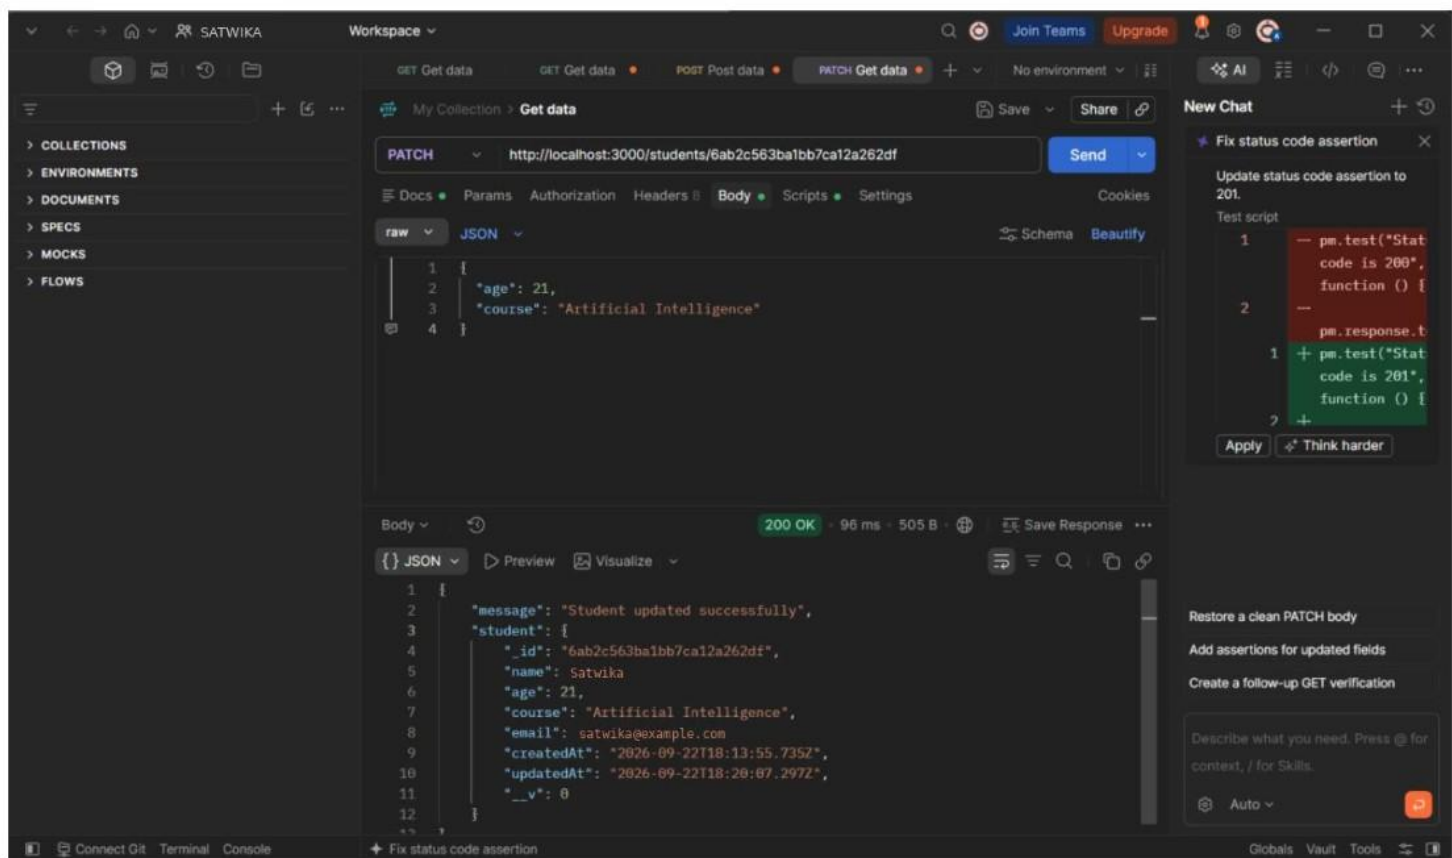

```
PS D:\StudentRecordsAPI> npm run dev
[nodemon] starting 'node server.js'
MongoDB connected
Server running on http://localhost:3000
```

Fix the failing status code test

Update the status code assertion to expect 404 for a missing student

Test script

```
1 - pm.test("Status code is 200", function () {
2   // ...
3   pm.response.json().then(function (data) {
4     // ...
5   });
6 });
```

Apply Think harder

Inspect response body parsing

Make tests assertion-based
